

My One Page Profile

Mr Norbury

Lead teacher of Computing and Design

What people appreciate about me

- Great sense of humour.
- Helpful and always looking for ways to support others.
- Calm.
- Competitive.
- Dedicated.

What I find difficult

It's not so much that it is difficult but more of a challenge; keeping up with an ever developing world of computer science.

What is important to me now

It's always family first; I've been married for 7 years and have two great kids. My daughter is 11 and my son is 2. I have a great job that is challenging yet extremely rewarding. I love the outdoors and I'm a Scout leader. Additional to setting up a great computing and design department at Reddish Hall that is equipped to deliver 21st Century education I'm currently developing an outdoor education programme that we will deliver during Friday's options.

What I like

I love the outdoors; an excuse to get outside. It doesn't have to be sunny but it helps! Cycling, walking, climbing, sailing, kayaking and anything new that I get the opportunity to take part in. I also love the beach; not so much the sitting still relaxing but playing with my two children. I also really enjoy gardening and DIY projects; I like to learn new skills and stretch myself.

How to support me

We all need support sometimes. Life can be tough but you get out what you put in. Sometimes I just need a chat to work out my next steps. I try to live my life with this simple motto 'anything is possible it's just that sometimes we have to find a different way of doing things'.

What is important to me in the future?

I have high aspirations within my teaching career. It is important for me to continue to develop and learn new skills 'every day is a learning day'.

There are so many things I want to do in my life and so many experiences I want to share with my family including; lots more travel.
