Parasitic Biomass in Japan

ADAM NILHARR

In 2026 Japan announced they were working on a new food source dubbed 'Biomass' that would be meat that grew like a plant. In 2029 The director of the project announced the project was nearly complete for worldwide shipping of near infinite food that would be used for the HW's new voyage to Mars and back for research.

During the build up to the biomass's completion Workers reported they saw a strange figure in a red trenchcoat tampering with electronics regarding the biomass's genetics.

HR dismissed these worker's reports as simple 'anxiety and hallucinations' Which would be their downfall in the end

When the product was unveiled last month the person who was on stage had a hole directly in their forehead. With a man standing behind them. Holding a pistol that was smoking from the barrel...

Said man took the microphone and a heavily modified remote

"Mankind was crushed under golden wheels of greed when they began to mess around with genetic encoding..."

WOW THERE WAS NOT A LOT OF REMNANTS ON WHAT I SAID!

Was all we were able to get from what the man said. Shortly after their speech that we have all yet to dig up. The man pressed the remote and let loose a fast growing and heavily dangerous parasitic entity that covered the entire island of Japan. And fed on most of the civillians there.

Further military investigation showed that the man responsible for this was revealed to have appeared in history during the 1600s, 1800s and now today. People guesstimate him to be somewhere in his 20s in terms of appearance.
